

**SUB-DISCIPLINES (GROUPS) OF MEDICAL DEVICES FOR
INSPECTION BODIES**

Nr. d/o	Name of group	Type of medical device	
1	Devices for monitoring and diagnosing the patient's vital functions	1.1	Monitors vital functions of the patient
		1.2	Electrocardiografe
		1.3	Pulsoximeters and pulsometers
		1.4	Non-invasive arterial pressure measurement devices 1.4.1 digital pressure meters 1.4.2 mechanical pressure meters
		1.5	Electronic spirometers and spirotahometres
		1.6	Electroencephalographs and encephaloscopes
2	Anesthesia and artificial breathing devices	2.1	Anesthesia devices
		2.2	Artificial breathing devices and lung fans
3	Intervention devices	3.1	Electrosurgery devices with high-frequency currents
4	Resuscitation devices	4.1	External defibrillation resuscitation devices
5	Infusion devices	5.1	Infusion pumps and syringe pumps
6	Care devices for newborns	6.1	Incubators for newborns, mobile incubators
		6.2	Resuscitation meals for newborns
7	Ultrasonography devices	7.1	Diagnostic and Doppler-effect ultrasound devices, ecoophthalmographs, ultrasonic osteodensitometers
8	Medical diagnostic devices in vitro	8.1	Automatic biochemical and immunological analyzers
		8.2	Semi-automatic biochemical and immunological analyzers
		8.3	Hematological analyzers
		8.4	Blood gas and electrolyte analysers and biological fluids Gas or liquid chromatographs
		8.5	Biochemical urine analyzers
		8.6	Biochemical urine analyzers
		8.7	Coagulometers
9	Sterilization and thermostatisation devices	9.1	Dry air sterilizers
		9.2	Steam sterilizers (autoclaves)
		9.3	Thermostats
10	Physiotherapy devices	10.1	Physiotherapy devices
11	Temperature measuring devices	11.1	Digital medical thermometers
12	Optical devices	12.1	Ophthalmological test lens set
		12.2	Ophthalmological refractometers
13	Centrifugal laboratory device	13.1	Laboratory centrifuges
14	Laboratory devices for pipetting	14.1	Laboratory devices for pipetting
15	Hearing aid testing devices	15.1	Hearing aid testing systems
